

CAPABILITY STATEMENT

INFORMATION DOMAIN EXCHANGE

PAC is committed to protecting and improving the information-sharing abilities of our partners. Our matured and unique tactical datalink capability has been an integral part of the Australian Multi TDL Network (MTN) over the last decade. Our team of experts provide the following services:

CAPABILITY DEVELOPMENT

Supporting the development and review of key documents during the capability life cycle, including:

- Modernisation studies for platforms to meet National Directives
- Operational Concept Documents
- Function and performance specifications
- Test concept documents

SYSTEM ENGINEERING

Specialist engineering expertise, including:

- New platform/product/capability development
- Capability enhancement (Engineering Change Proposals)
- Design & development
- Test & Evaluation
- Configuration management
- Integrated logistic support, including obsolescence management

SYSTEM INTEGRATION

Independent, vendor-agnostic services supporting the acquisition and integration of communication products that enable fast, secure, and efficient communications across multiple platforms and security domains, specifically:

- Secure data links, including Link 22, Link 16, SAT TDL J and JREAP A/B/C
- Implementation and integration of ANW2, VMF and SADL into existing systems to provide a truly networked force

FIELD SERVICE TECHNICIAN AND OPERATIONAL SUPPORT

Strategically located specialists provide hands-on support to platforms globally, specifically:

- Operational and maintenance training on TIE and C4i systems
- MIDS LVT, JTIDS and STT radios
- ADF's Initial Common Support Infrastructure (ICSI)
- Short and long-haul communication bearers

WHY PAC?

- Integrity, professionalism, and flexibility are core to everything we do.
- We support all phases of capability development, from design to sustainment and withdrawal.
- We provide bespoke and vendor agnostic Cross Domain Network Solutions.
- We are strategically located to support our clients.
